        < Image Button
        < Image Button
        < Image Button
        < Image Button
    < / Horizontal Scroll View >

Java.

Login Activity

```
public void    submit (View view)
    {
        Intent  submit Intent = new Intent (this, Overview Activity.
                                                        class)
        Start Activity (submit Intent)

    }
```

```
XML
<LinearLayout

  <Image View

  />

  <Button
        android:id =

      android:onClick = "logIn"
            :text = "Log In"

  />

  <Button

        android:onClick = "register"
          :text = "Register"

  />

</LinearLayout>
```

Java.

```java
public class MainActivity extends          {

    public void login (View view)
        Intent intent = new Intent (this, OverviewHousing. class);
        startActivity (intent);

    }

    public void register (View view) {
        Intent registerIntent = new Intent (this, RegisterActivity.
                                                            class)
        startActivity (registerIntent )

    }
```

```
XML                              Login Activity

  < Linear Layout

        / >

  < Button
      android : id =
      android : onclick = " fbconnect "
              : text = " Connect to Facebook "
        / )
  < Button
            onclick = " googleconnect "
            : text = " Connect to Google "

            / >

      < TextView
            text = "  — OR — "

        / >

  < Edit Text
            text = " email "
          / >
      < Edit Text                  < Edit Text
            : text = " password "          : text = " Confirm PWD "
        / )                          / >
      < Button
            onclick = " submit "
            text = " Submit "
```
