SI 543 Group 12 App Shared Preferences

1) Implement Login/Register functionality using Shared Preferences.
2) List of users should be retrieved using Shared Preferences. This screen is loaded after user successfully logins or registers.
3) Profile of user is retrieved using Shared Preferences i.e. when a list item is clicked in the list or when user clicks on profile icon in action bar to view his/her own profile, the page contents are retrieved using Shared Preferences.
4) Implement Login Session functionality using Shared Preferences. The action bar title shows the username as long as the user is logged in.
